

## Seed extraction kiln BW650

Seed extraction kiln BW 650 KD is a combination of a cone kiln and a seed drying cabinet with the same computer control and special programs as Nomeko's BW1600 and DC200/400.

There are nine cone boxes in each BW 650 KD. The air used in the process is brought to right temperature by passage through a water-heated battery.

### Technical data:

**Dimensions:**

Length: 3225 mm  
 Width: 1590 mm  
 Height: 2400 mm  
 Weight 1480 kg

**Dimensions:**

Box  
 Length: 1400 mm  
 Width: 1400 mm  
 Height: 500 mm

Capacity: closed cones (pine, spruce)  
 Approx 650 liters (9 boxes)

Extraction temperature +50°C.  
 Wet temperature +29°C.

External hot water supply +70°C. 10 liter/min

Process time 8-18hours  
 depending on the  
 Characteristics of the  
 cone lots

Power supply 500V 3x25A  
 Power consumptions: Approx 8 kW
